

A Complete Toolchain for the RWU-RV64I

Language

The language of the thesis will be English or German.

Handouts

- Project description
- FPGA Eval. Board

Project

Implement a complete toolchain for the RWU RV64I including, compiler, assembler, linker, and loader. Add this toolchain to Eclipse. Which HW is needed for the download? Implement it (see figure ??).

The scientific question is: Which program size optimization (memory usage) could be achieved?

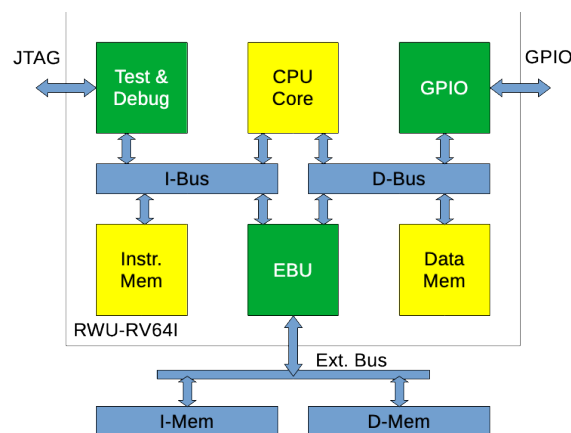

Abbildung 1: RV64i with Memory

Deliverables

- Documentation (Thesis)
- Presentation
